

- C'
23. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 1 in an organism.
 24. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 2 in an organism.
 25. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 5 in an organism.
 26. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 6 in an organism.
 27. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 7 in an organism.
 28. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 8 in an organism.
 29. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 9 in an organism.
 30. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 10 in an organism.
 31. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 11 in an organism.

32. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 12 in an organism.
33. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 13 in an organism.
34. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 14 in an organism.
35. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 15 in an organism.
36. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 16 in an organism.
37. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 17 in an organism.
38. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 18 in an organism.
39. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 19 in an organism.
40. A method of providing a volume substitution for soft tissue, said method comprising implanting an implant according to claim 20 in an organism.
